

Lego Build to Express at Springwood Primary School

What is Lego Build to Express?

Build to Express encourages children to develop language and communication skills, particularly around emotions and stimulates their creativity in a comfortable and motivating environment – all through Lego!

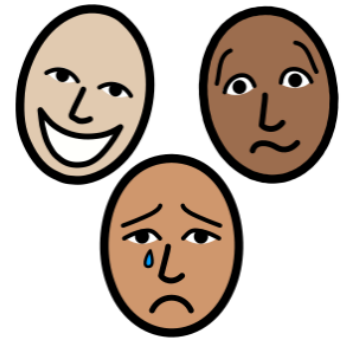

What happens?

Your child will work in a small group with a trained practitioner and have access to their own Build to Express kit. Each week they will free build a creation based on an idea or emotion. The kits are specially designed to get children talking about their feelings in a safe way.

How will my child benefit?

They will:

- Improve their confidence and self esteem in a small group
- Understand different emotions
- Work through specific scenarios that they may be struggling with.

Please contact Miss Wilson if you have any concerns you would like to discuss or if you require further information.
